Dear children of Year 3 & 4,

Firstly, many thanks for your continued support during these troubling times – the work the children continue to produce is really impressing both myself and Mrs De Rouffignac. Secondly, thank you for your responses to the emails regarding returning to work, Finally, the tests mentioned last week, are now live on the school website.

This week's work will continue to be open-ended tasks, which should keep your child busy throughout the week. If this is not the case, please email the class email and I will get some more work over to you.

### Maps, glorious maps - part 2:

Last week, we were looking at ordnance survey maps and online mapping tools – but where do maps originate? I would like you to complete research about all types of maps and how and why they are used. Perhaps you could find out who created the very first map? Don't forget about Google maps, atlases, road maps etc.

### Art & Design:

Andy Warhol kick started the pop art movement. Below is an example of this work. Can you produce some Andy Warhol inspired art? You could either use block printing or copy the same image and colour in your own style. You may also want to try editing an image online.

### French:

I'm (hopefully) heading to France in the summer, however it's been years since I've learnt any French, so I need your help. Can you make some slides about the basics: colours, numbers, directions and shops that

I may need to go to? It would be great if you could add some audio to the slides so I can really understand how to say the words.

**Maths & English:**

- The tasks above will include elements of maths and English. To supplement this, please complete a couple of activities every day on BBC Bitesize. Alternatively, I have uploaded some arithmetic and math reasoning to work through; and some grammar work.

Please continue to stay safe and healthy.

Yours sincerely,

Mr Young
